

# ART FOR SIGHT

*‘Save the sight of disadvantaged children who have no access to affordable medical support’*

Charity Art Exhibition & Auction  
Zurich & Lucerne, March & April 2026  
Supporting Project: ‘Children Right to Sight’ in Cairo

## The *Children Right to Sight* Project

The aim of this project is to enable a global grant to benefit disadvantaged children in Cairo and to prevent blindness early in life.

Thousands of children suffer from preventable eye diseases and their families cannot afford proper care. Early treatments change lives.

We are committed to giving every child the right to see and thus creating the basis for an independent life.

## The *Goal*

**Our ambitious goal for this project is to perform a total of 250 eye surgeries on children per year. Each operation requires around CHF 140-570.**

**Our club has already pledged CHF 5'000. However, to meet the requirements for a Global Grant we must reach a minimum amount of \$30'000.**

## ***The Magic of a Global Grant***

**With our local partner Rotary Club Kasr El Nile we aim to raise funds in the form of a Global Grant. As an example a donation of 1'000 CHF will add up to 2'800 CHF by the matching of District and Global Foundation contributions.**

**An additional advantage of a Global Grant, financed through the Rotary Foundation, is that the proper use of donations from Rotary International is monitored very closely.**

## *Patient Selection*

The surgeries are carried out by selected local eye care centers and hospitals in Cairo.

The hospitals carefully select eligible cases and provide all documents needed to confirm the patients' eligibility.

Ophthalmology surgeons examine the patients and perform the surgeries.
